COMMENT:

has action.

There is an issue as to whether OIR can have a list of all contractors.

Copies sent to C/GOG
C/GOG/OVPA

Should an Agency-wide AIM bulletin board
be managed by OIT or OIR?

ADMINISTRATIVE - INTERNAL USE ONLY

20 APR 1987

MEMORANDUM FOR: Director of Information Technology, DA

STAT FROM:

Director of Information Resources, DI

SUBJECT: Contractor Userids for CONFER

Ed
1. OIR requests that OIT provide the Analytic and Computing Services Division with a list of contractors' VM userids and badge numbers on a weekly basis. This information will be used to prevent contractors from gaining access to CONFER, an AIM bulletin board system being developed by ACSD.

2. OIR has developed CONFER with the concurrence and urging of OIT/NESG. The system allows AIM users to post documents in either private or public AIM folders. Anyone who has access to AIM may see information in public folders. Access to private folders is controlled by the folder creator. The Office of Security has informed us that public folders may not contain NOCONTRACT material because of the ability of contractors to access them.

3. To ensure full security, it is our intention to limit access to CONFER public folders to Agency staff employees only. To do so, we need either access to the OIT AIM user data base or have the userids of all contractors extracted and sent to us on a regular basis. We will then include in CONFER software to prevent these userids from accessing public folders. Having OIT send a CMS file containing contractor userids and badge numbers to us weekly will satisfy the Office of Security and our needs.
